### AVAILABILITY OF CITED DOCUMENTS

#### Non-USDA Patrons

The materials listed in this bibliography are available on interlibrary loan through your local library. The librarian in your Public, State, University or Corporate library can assist you in obtaining materials either in your area or directly from the National Agricultural Library. Current charges are:

Photocopies - \$5.00 for the first 10 pages  
\$3.00 for each additional 10 pages

Microfiche - \$5.00 for the first fiche  
\$ .50 for each additional fiche

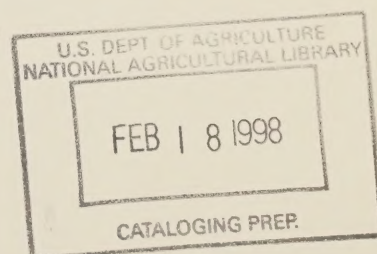

Microfilm - \$10.00 per NAL owned reel of microfilm.

Invoices are issued quarterly. Requests must comply with the National or International Interlibrary Loan Code. Questions about the availability of these materials may be directed to:

Lending Branch  
National Agricultural Library  
Beltsville, MD 20705  
(301) 344-3755

#### USDA Patrons

The materials listed in this bibliography may be obtained by submitting one Form AD 245 for each item requested to your local Agency or Regional Document Delivery System Library or directly to the address above.

0026

**The changing structure of female agricultural land ownership, 1946 and 1978.**

RUSOA. Geisler, C.C. ; Waters, W.F.~Eadie, K.L. Lexington, Ky. : The University of Kentucky. Rural sociology. Spring 1985. v. 50 (1). p. 74-87. Includes 35 references. (NAL Call No.: DNAL 281.28 R88).

Extract: Comparisons between women and male and joint male/female farmland ownership are assessed for the United States in 1946 and 1978. Findings indicate that women's share of farmland, measured in terms of average acreage and percent of total U.S. farmland, has increased somewhat over 30 years despite the disproportionately large share retained by male and joint male/female owners in both time periods. This

advance is not reflected in the per acre value comparisons between women and other owners, however. Tenure and mode of acquisition of the farmland differ with gender, probably due to the late age at which most women acquire land; women agricultural landowners are more apt to be landlords than owner operators or part-owner operators. The need for expanded research on women as owners of farmland is clarified.

0027

**Characteristics of women in farming.**

CAGRA. Thompson, D.E. ; Gwynn, D.-Sharp, C. Berkeley, Calif. : The Station. California agriculture - California Agricultural Experiment Station. Jan/Feb 1987. v. 41 (1/2). p. 16-17. (NAL Call No.: DNAL 100 C12CAG).

0034

**A comparison of rural women's time use and nutritional consequences in two villages in Malawi.**

Engberg, L.E. ; Sabry, J.H.-Beckerson, S.A. Boulder : Westview Press, 1988. Gender issues in farming systems research and extension / edited by Susan Poats, Marianne Schmink, and Anita Spring. An international conference hosted by the Women in Agricultural Development Program, February 26-March 1, 1986, University of Florida. p. 99-110. Includes references. (NAL Call No.: DNAL S494.5.S95G46).

0035

**A comparison of the rank and salary of male and female agricultural economists.**

Lee, L.K. Lexington, Ky., American Agricultural Economics Association. American journal of agricultural economics. Dec 1981. v. 63 (5). p. 1013-1018. 4 ref. (NAL Call No.: 280.8 J822). Extract: The distribution of female agricultural economists by type of job, level of education, and among academics, tenure status, is analyzed along with data on salaries, experience, and research productivity. Second, the relative rank of women within the profession is explored by comparing profile data of male and female AAEA members. Finally, a model is developed to determine if significant salary differentials exist between men and women of comparable rank. Conclusions about the current status of women in agricultural economics are presented.

0036

**Complementary roles and asymmetrical lives. Farmers' wives in a large farm environment.**

Symes, D.G. ; Marsden, T.K. Assen : Van Gorcum. Sociologia ruralis. 1983. Presented at the XIIth Congress of the European Society for Rural Sociology, Budapest, July 25-29, 1983. v. 23 (3/4). p. 229-241. Includes references. (NAL Call No.: 281.29 S012).

0037

**The conduct of the survey on the opportunities for and status of women in agricultural economics.**

Lundeen, A.A. ; Clauson, A.L. Lexington, Ky., American Agricultural Economics Association. American journal of agricultural economics. Dec 1981. v. 63 (5). p. 1010-1012. (NAL Call No.: 280.8 J822). Extract: At its July 1980 meeting, the Executive Board of the American

Agricultural Economics Association authorized formation of an ad hoc committee to investigate systematically the status, role, and opportunities for women in agricultural economics. A survey of females and males in the profession, including but not limited to members of AAEA, was undertaken. Because of the small number of women in agricultural economics (e.g., membership lists indicate that women comprise less than 5% of the AAEA), all women who could be identified in agricultural economics or related specialties were included in the survey. A sample of the much larger population of male economists was selected.

0038

**The contribution of women to agriculture in Taiwan.**

Gleason, J.E. Boulder : Westview Press, 1988. Gender issues in farming systems research and extension / edited by Susan Poats, Marianne Schmink, and Anita Spring. **An economic analysis of the impact associated with the employment of farm women in the farm labor force.**

LAXDA. Broussard, K.A. ; Heagler, A.M. Baton Rouge, La. : The Station. D.A.E. research report - Department of Agricultural Economics and Agribusiness, Louisiana State University, Louisiana Agricultural Experiment Station. Apr 1986. (650). 56 p. Includes references. (NAL Call No.: DNAL 100 L935).

0057

**Economic performance of farm women of weaker sections in dairy enterprise (Labor, income, India).**

Rani, U. ; Singh, C.B. Karnal : Agricultural Research Communication Centre. Asian journal of dairy research. Sept/Dec 1982. v. 1 (3/4). p. 206-212. (NAL Call No.: SF105.A84).

0058

**Economic status and women's participation in agriculture: a Botswana case study.**

RUSOA. Fortmann, L. Lexington, Ky. : The University of Kentucky. Rural sociology. Fall 1984. v. 49 (3). p. 452-464. Includes 53 references. (NAL Call No.: DNAL 281.28 R88).  
Extract: Data from 358 households in 12 sites representative of climatic, geographical, and agricultural variations in the eastern communal areas of Botswana show that differences in the agricultural practices and extension contact of male- and female-headed households largely disappear when economic stratum is controlled. Female-headed households are shown not to be a homogeneous group. There appear to be greater similarities between farmers within the same economic stratum regardless of gender than between farmers of the same gender in different strata.

0059

**Evidence on barriers to the parallel advancement of male and female agricultural economists.**

Lane, S. Lexington, Ky., American Agricultural Economics Association. American journal of agricultural economics. Dec 1981. v. 63 (5). p. 1025-1031. 15 ref. (NAL Call No.: 280.8 J822).

Extract: In this analysis, the hypotheses to be tested, stated in the null form, were that (a) attitudes, human capital, and mobility did not result in salary differences between female and male agricultural economists holding equivalent positions, and (b) barriers to parallel advancement were not falling and therefore salary differences for male and female agricultural economists holding equivalent positions, controlling for years out of school, should be the same for younger and for older women. The evidence suggests that attitudes of both the males and the females and the difference in human capital do result in differences in salaries per year since completion of the requirements for the highest degree and the main impact of these factors is on younger female agricultural economists.

**Farm women: contribution to farm and family.**  
Salant, P. Mississippi State : The Station. Agricultural economics research report - Mississippi Agricultural and Forestry Experiment Station. Mar 1983. Mar 1983. (140). 36 p. Includes 12 references. (NAL Call No.: 917031(AGE)). Extract: This study describes labor force participation by farm women in the Sand-Clay Hills region of Mississippi and Tennessee. Over half of the women in the 29-county study site were employed outside their homes in 1980, either on- or off-farm. Three fourths of those reporting employment worked off-farm, most frequently in the manufacturing and service sectors. They were most likely to join the labor force between the ages of 35 and 54, after their children had begun school. Earnings from off-farm employment contributed significantly to total household income.

Extract: A 10 percent stratified random sample survey of migrant Hispanic farm women was conducted in 1978 in Wisconsin by bilingual interviewers. Interviews with the women revealed that they have greater numbers of children than other women in the United States. They bear children at younger ages, have greater infant mortality, and use fewer contraceptive techniques. We hypothesize that their fertility behavior is related to age, level of education, and degree of assimilation, the latter measured by bilingualism. Results show that the variable most strongly associated with live births is age; when it is controlled, education is the main predictor. When the effects of both age and education are controlled, bilingual capacity also contributes to explaining births. Education, on the other hand, explains most of the variance in expected number of children. We conclude that high fertility patterns are likely to continue among migrant farm women until level of education improves for the children, thus increasing their bilingual capacity and improving their occupational opportunities.

XAEFA. Scholl, K.K. Hyattsville : The Service. Family economics review - U.S. Department of Agriculture, Agricultural Research Service. June 1982. (3). p. 3-9. Includes 13 references. (NAL Call No.: DNAL aTX326.A1U5)

Extract: Farm women are involved in their family's farming operations through labor participation and make an economic contribution to both the farm unit and the family unit. Although the major responsibility of the women is caring for the home and children, her farmwork is supportive of the farm unit since she is occasionally involved in almost half the farm tasks. Results from all the studies of task participation of farm women indicate that those women need specialized instruction and information to improve the quality of farm life.

Extract: The purpose of this paper is to provide a methodology that incorporates gender differences in the farm household into development project planning. The paper provides a quantitative comparison between a development project using a conventional planning methodology based on the aggregated farm household and a planning methodology in which project impacts are disaggregated by sex. Specifically, the study focuses on gender role differences relating to labour, income, and financial obligations among one ethnic group in central Nigeria--the Tiv--and the implications of these differences with respect to the ability and incentive of each sex to adopt technologies introduced by an agricultural development project.

**Labor force participation of metropolitan, nonmetropolitan, and farm women: a comparative study.**

Bokemeier, J.L. USDA. ; Sachs, C.~Keith, V. Knoxville, TN : Rural Sociological Society. Rural sociology. Winter 1983. Winter 1983. . 48 (4). p. 516-539. Includes 52 references. (NAL Call No.: 281.28 R88).

Extract: Research on the labor force participation of rural women is scant and has failed to examine separately farm and nonfarm-nonmetropolitan women. In this study, the socioeconomic correlates of labor force participation of metro, nonfarm-nonmetro, and farm women are identified. Data from a large statewide mail survey (N = 5,880 women) are examined to compare personal, socioeconomic, and family characteristics and the occupations and industries of women in the labor force. Findings regarding correlates of labor force participation indicate that family and status are the most influential correlates of metro and nonmetro women's labor force participation, while status factors are more influential for farm women.

Extract: The present study draws upon the work of Gary Becker and the branch of economic theory known as the "new household economics." Based on the theory of consumer behavior, recent neoclassical labor supply theory posits that labor force behavior reflects household decisions concerning time allocation and an individual's relative

productivity in alternate activities. Viewing the household as a production and consumption unit and time as an input in the production process, variation in labor force participation reflects differences in the "opportunity cost" of a woman's time.

**Women's labor and the technological development of rice cultivation in Japan.**

Ohki, R. Aldershot, Hants, England : Gower, c1985. Women in rice farming : proceedings of a conference on Women in Rice Farming Systems, The International Rice Research Institute, P.O. Box 933, Manila, Philippines, 26-30 September 1983. p. 55-64. (NAL Call No.: DNAL HD6073.R482W6).

O306

**Women's preferences among selected textile products / prepared in the Bureau of Agricultural Economics .**

Washington, D.C. : U.S. Dept. of Agriculture, 1947. Cover title.~ "December 1947.". 124 p. ; 23 cm. (NAL Call No.: DNAL 1 Ag84M no.641).

O307

**Women's productivity in agricultural systems: an overview.**

Cloud, K. ; Overholt, C. Brookfield, VT : Grower Publishing Co. Ltd. I.A.A.E. occasional paper - International Association of Agricultural Economists. 1983. 1983. (3). p. 166-171. Includes 16 references. (NAL Call No.: 922946(AGE)). Extract: The purpose of this paper is twofold: to identify the literature relevant to understanding women's productivity in agricultural systems, and to propose a coherent framework for examining women's productive activities. Such an initial effort, by its very nature, must be exploratory rather than definitive. Our purpose is to begin to clarify issues and identify linkages which will promote more precise analyses in the future.

O308

**Women's role and agricultural technology.**

Kumar, S.K. Baltimore : Published for the Int Food Policy Research Inst by Johns Hopkins Univ Press, c1987. Accelerating food production in Sub-Saharan Africa / edited by John W.
